Chapter 5: Report Selection

5.1 INTRODUCTION

Welcome to Report Selection, one of the functions within NSLDS.

How Does the Report Selection Option Benefit Schools?

Report Selection makes NSLDS data available to you via your Title IV WAN mailbox. This data, in the form of a data file or report, aids in locating loan and student information. The currently available reports or data files that can be requested are as follows:

- Exit Counseling,
- Default Status,
- School History Attributes.

5.1.1 Conceptual Overview

Report Selection is a function which retrieves existing data according to specified parameters. All reports will be requested online, through the Report Selection Menu, and outputs will be returned to you as electronic files through Title IV WAN.

The types of reports that you can request are described in this section.

Note: For a detailed explanation of logging on and exiting this function, please see Chapter 2: Getting Started.

What Do the Reports Look Like?

The display of the actual reports can be found in the section of each report type of this chapter of the NSLDS User Guide. Below, you will find a list of the report titles, which are associated with parameter screens. There is a brief description of each report. These are the screens that allow you to define the scope of the report.

**5.1.1
Conceptual Overview
(continued)****General Rules on Selecting and Retrieving the Reports**

- To run any report you will go to the specific report screen, set the required parameters for the report, and type SU for Submit. NSLDS will process your request and transmit it to your WAN mailbox.
- Although the WAN is the only delivery vehicle available to schools, you must designate it by indicating WAN after pressing F9 for Output Medium. WAN will then appear at the top of the parameter screen in the field labeled "Output Medium."
- You must also designate whether you want the output to be a print file which is formatted like the sample reports in this chapter that you can use for further processing. This is done by placing a 1 or 2 in the field labeled "Report Type." If you request a data file and would like to request a copy of the record layout, call the CSC at 1-800-999-8219.
- You have some flexibility in determining the borrowers or data that will appear on your report by setting the report parameters. You will indicate the desired parameters by typing on the line to the right of the field indicator on each screen. The characters below the line provide the proper format for the data field you are creating.

**5.1.2
Purpose**

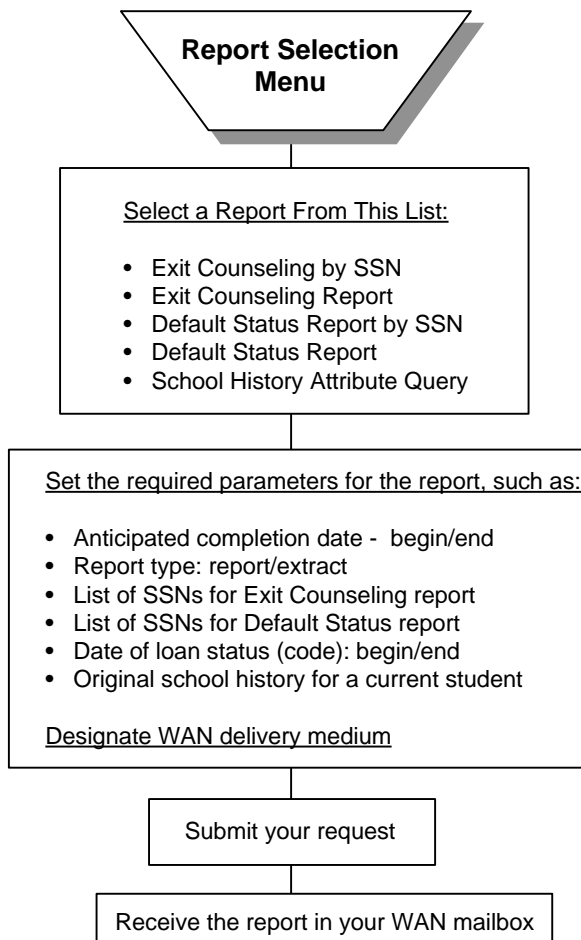

The purpose of Report Selection is to provide data in the form of existing reports or extracts, online, according to parameters specified by you during the process of submitting a request.

You can take a look at some examples of the actual reports in Section 5.2.5: Display of Actual Reports. The remainder of this chapter will help you further understand the process of submitting the request that best suits your needs.

5.1.3 Process Chart and Description

Report Selection takes information from the user, conducts a search on pre-existing reports, then responds with the requested report. This process is illustrated below.

REPORT SELECTION PROCESS CHART

Some reports within Report Selection require you to enter the Loan Status codes. The following table is for your reference.

REPORT SELECTION
SCREENS**

This section contains detailed instructions on how to access all of the Report Selection screens.

5.2.1**Report Selection Menu (RC10)****What Does the Report Selection Menu Screen Do?**

This is the main screen for report selection. The menu lists all available reports. This menu will change as new reports are added or less useful ones are deleted.

**Note:**

If you have a suggestion for a standard report, you should contact the Customer Service Center at (800) 999-8219 to make your recommendation.

Currently, there are three different types of reports:

- Exit Counseling Report
- Default Status Report, and
- School History Attribute Query Report.

The Exit Counseling Report and the Default Status Report are similar in that both reports can be requested by SSN. The procedures and/or steps for requesting the reports by SSN are the same.

In the process of logging on, you will view the following two screens leading up to Report Selection.

**Exit Counseling Report (SCH01B) and Default Status Report (SCH02B) by Date (RC11)****What Do the Exit Counseling and Default Status Reports Do?**

The two reports are different in that one gives information by anticipated completion date, while the other gives information based on loan status begin and end date.

- The Exit Counseling Report (SCH01B) provides the same information as SCH01A, except you can select students who have anticipated they will graduate within a specified time frame.
- The Default Status Report (SCH02B) selects the results based on the beginning and end dates of the loan status and the loan status code. The report selects all students that are in default within a specified time frame.

**SCH06A School History Attribute Query Report (RC11)****What Does the School History Attribute Query Report Screen Do?**

There is one report related to School History Attribute Query.

- SCHO6A School History Attribute Query retrieves data according to the SSNs you have entered.

This report is designed for schools that submit information regarding Federal Perkins loans. On this screen you will identify a specific student and associated loan, and request to see the history of selected events. For example, the loan status event occurs whenever there is a new loan status resulting in a change in the effective date.

This information is helpful when correcting data sent in previous submissions to NSLDS. The first seven fields are: codes for the original school, student SSN, DOB, first name, loan type, first disbursement date, and event. The other fields are optional and NSLDS will provide the history for each field or event that you identify. You will access the additional fields by pressing F8.

It is assumed that the users of this screen are familiar with the requirements of Perkins Loans for NSLDS and have access to the Data Provider Instructions (DPI) for schools. The DPI explains each field requested on these screens.

**Note:**

The Sort Selection has abbreviations for the sort fields. Sort fields which you may not have seen before are as follows:

- LNME - last name,
- FNME - first name,
- MI - middle initial, and
- GA - Guaranty Agency
- CD - Code
